

Saturday December 5th 2026 - 13h30 – 17h00
Art & Science *Imagination* - Residency Program - Public Conversation

How does imagination shape artistic and scientific research? What happens when artists and scientists share their practices, questions and ways of looking at the world over the course of a residency?
At the closing of three months of residing in scientific laboratories, **Embassy of Foreign Artists** invites the public to join the conversation and discover the experiences of the three artist–scientist duos.

Participants

Nina Gross, visual artist from Great Britain teamed with Prof. *Raphaëlle Luisier*, computational biologist, head of the IA for RNA lab at the Department of Bio Medical Research at the University of Bern.

Margarita Wenzel, visual and sound artist from Germany teamed with Dr. *Karolis Degutis*, cognitive neuroscientist, MIP:lab at Campus Biotech.

Natalie Braido, visual artist from Brasil teamed with Prof. *Yujia Zhang*, microengineer, head of the Bio-Iontronics Lab at EPFL.
